PATIENTS, NOT PROFITS!

Our **National Health Service** is under vicious attack from the Coalition Government. For decades people in Britain fought to establish a universal health care system, the NHS, which was born on 5th. July, 1948. Now Health Minister Andrew Lansley's *Health and Social Care Bill* aims to destroy **OUR NHS**.

SPENDING CUTS: At the last General Election David Cameron said he would protect spending on the NHS from cuts. Now he wants £20 billion cut from the NHS budget by 2014.

PRIVATISATION: The Government want most NHS patient care provided by private, profit-making companies. This will not mean better care for patients but huge profits for owners of private firms.

STAFF CONDITIONS: Already the pay and conditions of medical staff are deteriorating as they are pushed out of NHS employment into private companies. The Government aims to carry further this attack on our medical carers.

KILL THE BILL!
